

TRA Online allows access to real time tourism statistics using Tourism Research Australia’s *International Visitor Survey and National Visitor Survey* data. Users can build customised tables using data points of interest from the surveys.

PLEASE NOTE: At the present time created tables should not be saved for ongoing use, but can be downloaded in Microsoft Excel format.

For help using the available databases, the guided Training Manual is a valuable resource to understand the functionality and how data points should be interpreted. The current questionnaire templates are also provided under ‘TRA reference material’, along with additional user guides. Find these resources at the right of screen, by selecting  and ‘TRA reference material’. You may also find the brief ‘Tour’ of the interface useful.

If you need further support, contact the LRC at lrc@angliss.edu.au

For more information about the methodology of the surveys, go to <https://www.tra.gov.au/About-us/methodology>
